2. The following is an examiner's statement of reasons for allowance:

Prior art fails to disclose or suggest, inter alia, a class D amplifier comprising a switch mode power supply having control circuitry for determining when the voltage of one of the voltage sources exceeds a first threshold value, and, in response to such a determination, periodically operate the switch associated with the one voltage source ON and OFF, thereby redistributing energy from the one voltage source to the other voltage source.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
